DataTech Labs Data Recovery is a nationwide leading provider of data recovery services. Headquartered in Denver, Colorado, our professional data recovery lab can recover data from all media devices including hard drive data recovery, raid data recovery and server data recovery by utilizing cutting edge proprietary software, mechanical engineering and innovative procedures. Our highly skilled engineers are experts in dealing with failed hard drives and RAID arrays.

Founded in 2006 by owner Jeff Patrick, Datatech Labs Data Recovery specializes in recovering data for all types of data configurations including:

Hard Drive Data Recovery	RAID Data Recovery	Operating Systems	Removable Media
• Hard Drive • Hard Disks • Computer Data Recovery • Laptop Data Recovery	• RAID 0, 1, 3, 5, 6, 10, 50 & JBOD • Server Data Recovery • NAS • SAN • VMFS (Virtual Machines)	• Windows • Apple Mac/Macintosh • Linux • UNIX	• External Hard Drives • Flash Drive • Camera Card • Tape Data Recovery

Advantages of Datatech Labs:

- **FAST Turnaround (within 72 hours)** – In most cases, we will recover your data within 72 hours of receiving the failed drive.
- **Leading Expert Engineers in Data Recovery** – With decades of experience, our engineers have seen any and all type of failures and can handle anything that comes their way.
- **Consistently Highest Success Rate in the Industry** – Recurring weekly, we have an average success rate of 90+% full recoveries. Meaning we are great at getting all your data back
- **No Data, No Fees Policy** - We will not charge you if we can't recover any of your data –full reimbursement with recycling or mail return options available to deal with your failed drive.
- **Expedited and 24/7 Emergency Service Available** – If you need your data recovered fast, we have expedited services where we will make your case an engineer's priority in the work week or emergency service where we have multiple engineers working around the clock to get your data back.
- **Data Recovery Priced on Complexity – *Not Value*** – Unlike most competitors, Datatech labs makes price estimates on how complicated the recovery will be, not on size of the system, how important that data is, or who that data is for. This helps us provide optimal prices to our customers.
- **2 Dedicated Laboratories** – One located in Boston and One in Denver, our state of the art laboratories are dedicated to all types of recovery for fast turnaround and vast preparedness for any drive failure that comes our way.
- **Class 100 Certified Clean Room -** To repair hard drives, we need to keep them safe from contamination. With our ISO 5 certified 100 clean room, your drive is safe from debris and dust that could damage your hard drive during recovery.
